

THE CITY'S MASSIVE DESTRUCTION

CHARACTERS:

- **RICO** (the boy that doesn't recycle)
- **PAULA** (Rico's girlfriend)
- **THE CONTAINERS** (containers)

SETTING: New York City.

Once upon a time there were four containers, they were: a glass container, a metal container, a plastic container and a paper container.

People used the containers properly; they lived in New York, a beautiful city with many people and with many high skyscrapers and the statue of liberty, a very beautiful monument, and a lot of shops.

One day Rico, a very cool boy that studied a lot and did his homework every day, was told by his mother to put something in the container. Every day, when he went to put something in the containers, he put the corresponding rubbish on the corresponding container. But this day he had a date with his girlfriend Paula, and he put the rubbish anywhere.

At that moment nothing happened but at night...

The containers started to change; they became very big robots because Edward didn't recycle and the containers started to destruct the city and all the people in this city died and the containers destructed the rest of the world and Paula and Rico got married.

**MORAL: If you don't recycle, there will
be a lot of problems.**
